Demon Sea Knight: It's generally a really fun game, but the downside is it's too hard and characters cost a lot and I don't like the way u get off 2 levels and you have to pay to stop that please change it and make it a little easier on the battles because LV 4 is fricken 1 shot. LegoEmPfESS games: This is a fun and addictive game! However, please make a PvP option to fight with friends. Moreover, nice gameAneL Mero: It makes so little sense, well I mean borrowing assets from a dragonball you could get the names of the right shape and their multiples. Because when the first freeze is in medium difficult when you have SS2. But I like the reference and the sense of tactics and progression, plus stick figures. It also FORMS FOR GOD'S SAKE. I know I'm talking like I gave it 2 or 3 stars, but it's just things that look out of place, it's generally really good and I love it. Four stars for you! Xavier Dupree: I love him. I love it when he beats you, you get stuck down two levels. That gives you room to get better. And I also like how Zoku got 18 different shapes. And they do so that it is not so much buy different forms. Thank you to the creators. You can figure out how, when I see the coins, they're really dozier to pick them up for me. And there are no ads, so thank you. Dragon Ball has always been one of the most exploited Universes in many different entertainment facilities. He has a series of manga that was supported by many people and then adapted into anime, and the game continues to receive fans love for years. Even now, there are still many people who are interested in this topic. It always retains its fire and brings revenue for each related product period. Even the author himself, having stopped composing the plot of Seven DragonBall for a long time, still returns and continues to make dragon ball super part. The fact that many later games use images of celebrities such as Songoku or Vegeta informally is still prevalent. Easy to play the game and easy to control. Stick Z: Super Dragon Battle is such a product. It allows the player to control the familiar characters from the popular Dragon Ball series, but has been redesigned with extremely new images. If you've tried to play some ONESOFT games, it certainly won't feel weird with Stickman designs. This time the game manufacturer continued to use it for Dragon Ball symbols to create this product. Stick Z: Super Dragon Fight is an action game with specialized and stable antagonism, not mixed with other factors that make it slim. It's like an original comic. These characters meet and fight to defend their ideal of life. And often, Songoku will be the last winner, because he is the guardian of the Earth. But in this game, if you choose a Songoku character, it is unlikely that you have achieved an absolute victory. Because everyone has the same number of skills and achieves a precise balance of power. So the winner is the one who can make the most of the character's ability, what is the Aura of the protagonist (LMAO). 50+ bosses with 100 skills The system of characters in the game is extremely diverse and designed with the same image as Stickman. However, do not think that this type of image design will make your character boring. Since all characters have their own body characteristics, especially in the Dragon Ball anime series, everything is designed clearly and differently. You will see that each character will have a hairstyle and hair color design that just by looking at it, you know who it is right away. Moreover, their costumes are also designed to express the character of the character. You can control in Songoku, Vegeta, Trunks, Piccolo, ... Classic familiar to players and fans, as well as new new that appear in Dragon Ball Super, eg. Biru, Whis, black, ... Since this is a face-to-face game, it means that there is little interference in leveling the statistics, but role-playing games, so the hero's statistics are also made quite simple. Each character will have special skills and several forms of transformation. During the battle you can use your 4 special skills and AA attack. There will also be two spells.
